## Tribble with my Skin

10

oatzs

👍 43 (89% liked) 🗨️ 5

My Minecraft account got hacked and now my skin seems to be a little off...

Might be having trouble with the tribbles...

Mind checking it out? My Minecraft username is "oatzs".

PS: A Minecraft account/instance is not required for this challenge. The most recently used skin is the suspicious one.

# 1 Abstract of challenge

This challenge boils down to finding the decal that is used on the player model of oatzs, therefore we need to find his account somewhere.

## 1.1 Problem description

My Minecraft account got hacked and now my skin seems to be a little off...

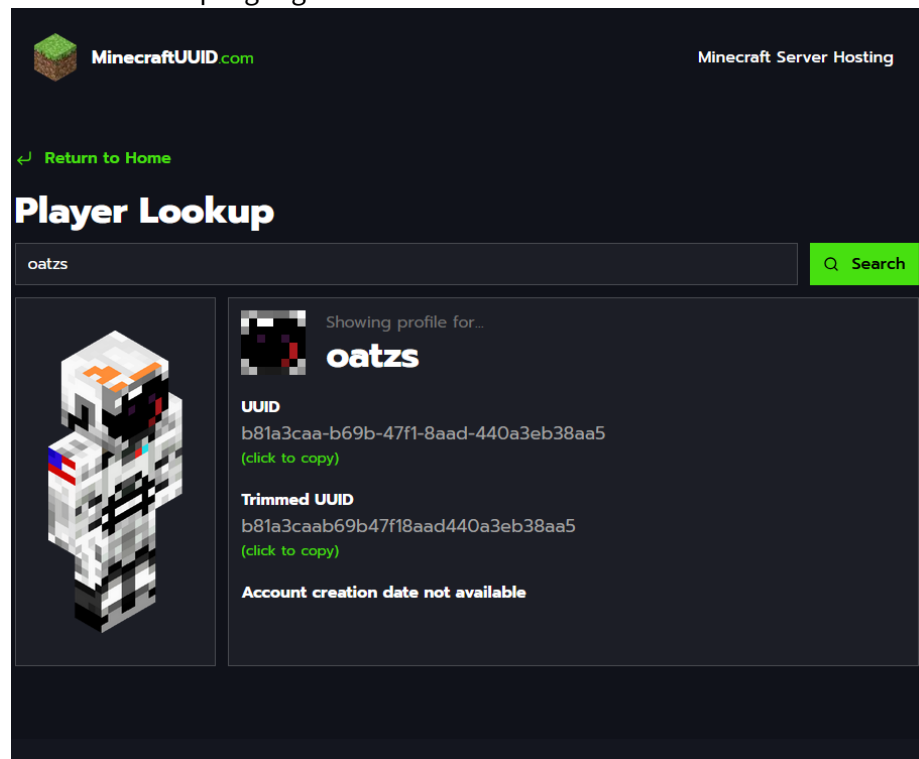

Might be having trouble with the tribbles...

Mind checking it out? My Minecraft username is "oatzs".

PS: A Minecraft account/instance is not required for this challenge. The most recently used skin is the suspicious one.

## 2 Solution

The first step I took was finding a way to uniquely identify the Minecraft account of oatzs. I've thankfully managed to find the Unique User ID (UUID) of oatzs with a simple google search.

After looking for a different Minecraft archive that allowed me to download oatzs' skin.

### 3 Flag

The flag was found in the texture of the skin itself, but it is incredibly small and hard to decypher. The flag is: [sun{tribble\\_Craft}](#).
